Office Action Summary

Art Unit: 3662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Burman.

Fig 2-9 of Burman disclose an algorithm which operates on the normalized feature vector derives from the spectral signature of a single pixel of an image set in order to develop data models which represent spectral end members. As a result, it is not clear which limitations set forth by claims 1-5 define over Burman in a clear and unobvious manner.
